PREFACE

The War List of the University, containing in its first issue approximately 9,500 names, is limited to those Members (viz., Appointed and Recognised Teachers, Graduates and Matriculated Students) who have served, or are serving, in His Majesty's Forces during the present War, but it does not include the names of those who are, or have been, engaged in civilian war service.

In the University of London, where there are both External and Internal Students, many of whom in after life lose touch with the University, it is impossible for the List to be absolutely complete or accurate in all its details.

In many cases the particulars of service have had to be generalised under regiments in order to meet the requirements of the Censor, and consequently it has not been possible in all cases to give detailed information as to units and battalions.

The List contains the names of several Members of the University who are known to be on Active Service, but whose rank and regiment are unknown. The University will be glad to receive such further details from anyone who is in a position to supply them.

The University proposes to prepare and issue a supplement in which will be incorporated until the termination of the War the names of Members of the University engaged on Active Service not included in this List.

E. C. PERRY,
Vice-Chancellor.
